

# Notable Deployments

## **Sable Island East Light - solar endurance champ**

This sensor node has a Beaglebone White, 4 functionedongle Pros (not Pro Plus) and had been running continuously on solar power since 2014-01-14 18:30:28 UTC when last checked on 2017-09-13 18:30:28 UTC (> 3.6 years without a reboot).

This site benefits from a mild climate, little snow accumulation, and no obstruction of solar panels.
